Dear Hotma Rumahorbo,

You may find the comments at the bottom of this page

<https://www.scimagojr.com/journalsearch.php?q=21100218323&tip=sid&clean=0>

BEALL'S LIST was actually from a personal blog. Every submission to Global Journal of Health Science will be conducted a rigorous peer review. The financial policy concerning publication fees to cover the journal costs is also the general operation rule of open access journals.

Best Regards,

Erica Grey

Subject: Re: need information

Thanks for the very fast response. Regarding administrative requirements in my office,

1. Can I get a copy of the explanation letter from Scimago? it really helps me in my problem.

2. Is it true that the Canadian Center of Science and Education is predatory? as stated in BEALL'S LIST OF POTENTIAL PREDATORY JOURNALS AND PUBLISHERS.

I apologize for my question, really hope not.

Thank you for your great help.

Ward regards

Hotma

Dear Hotma Rumahorbo,

It is with great regret that Global Journal of Health Science, is delisted from Scopus and SCIMAGO coverage. We found that the SCImago Team has provided the clarification on this issue.

"As you said, our data come from Scopus/Elsevier, which offers an annual copy of their database. All the metadata have been provided by Scopus /Elsevier in their last update sent to SCImago (May 2020), including the Coverage's period data. Besides, as the SJR is a static image of a Scopus (which is changing every da), we always recommend our users to consult the Scopus database directly.

Concerning your questions, we understand that, since the date indicated by Scopus/Elsevier (2016), the journal is no longer indexed in its database. However, while the Citation Window is still active in Scopus, SCImago can show scientometric indicators for the journal (up to three years). Therefore, a journal can be SJR and not being indexed in Scopus.

We hope that this information clarifies your doubts.

Greetings from Spain and thank you for using the SCImago products,
SCImago Team"

Best Regards,

Erica Grey

Subject: need information

Dear Erica

I am very grateful for the opportunity to publish articles in this great journal. I have published for my 2 articles in July and September 2019.

But something surprising about this journal on Scimago jr is that the GJHS index is only 2012-2016. My question is, what is the status of GJHS after 2016, especially when our article was published (2019)?

Please explain from the journal manager, because this condition is enough to make us worry.

Thank you, warm greetings

Hotma Rumahorbo
