The reviewer(s) have recommended revisions to your manuscript. Therefore, we invite you to respond to the reviewer(s)' comments and revise your manuscript. Please see the comments below.

Reviewer A:

Add statistics tools and statement that authors obtained permission to translate and Tested for its validity from original developer

Add study limitation before conclusion

add implication after conclusion

Please check again English grammar

Reviewer B:

1. Please add more phenomena related to anxiety and self-efficacy in introduction section of abstract.
2. In the main text, the magnitude of the study did not well-described in the introduction. Please describe any other instruments related to anxiety and self-efficacy have been developed, the strength and weakness of them, and the demand of new instruments.
3. The development of the instrument did not describe clearly. Did the author conduct a Delphi? How to arrange the question and items? Please refer to measurement development procedures.
4. Did you analyze the item analysis and internal consistency? Please explain why...
5. According to theory of Ziedner and Bandura that you used, there are some dimensions. Meanwhile, your results are unidimensional. Could you please discuss for that?
6. Please revise the references writing style following the author guidelines.

Please also highlight the changes to your manuscript within the document by using the track changes mode in MS Word or by using bold or colored text.

I look forward to receiving your revision.
